

Cardinal Scale's model 215 digital weight indicator has NEMA 4X/IP66 stainless-steel wash-down enclosure with a 1-inch-high LCD display for indoor or outdoor weighing applications. It has dual serial ports, 10-key numeric keypad, multiple print formats, and powers eight load cells.

Cardinal Scale's model 215 digital weight indicator has NEMA 4X/IP66 stainless-steel wash-down enclosure with a 1-inch-high LCD display for indoor or outdoor weighing applications. It has dual serial ports, 10-key numeric keypad, multiple print formats, and powers eight load cells. The weight indicator uses 10 AA rechargeable batteries. It also features onboard print ticket positioning and can use software for advanced ticket formatting. An axle weigher operation mode with three preset weight comparators is standard. Connectivity options include analog output, 10/100 mbps ethernet TCP/IP, Allen-Bradley interface, fiber-optic port (glass or plastic) and industrial ethernet/IP. *Cardinal Scale*
