Buffalo Wire Works

Booth 1520

The Tensioned Modular PFX addresses open area and throughput issues often encountered by producers running all polyurethane screen systems. By embedding high-efficiency PFX self-cleaning screen technology into a polyurethane frame under high tension, with the tensioned feature allowing for increased support bar spacing, it maximizes self-cleaning.

DSC

Booth 1504

The Sharkuda Dredge Class is designed to excel in areas otherwise difficult to access. Sharkuda incorporates two newly patented technologies: the new walking carriages allow the dredge to continually move forward without anchors for continuous, uninterrupted production; and the new swinging ladder allows for wide deep swings to operate more efficiently than any other conventional dredge on the market.

Polydeck

Booth 1238

"The thing I love about Polydeck are the long-term relationships I have established," said David Stewart, senior production manager for Midsouth Aggregates. "Everywhere I go, I put Polydeck in, and it's been hugely successful. There's no other company that has more than 1,000 dies and options for panels that can meet any application need."

www.polydeck.com

Stedman

Booth 1538

Start right with a Stedman Mega-Slam Primary HSI. With a large feed opening and solid rotor design, the Mega-Slam effectively handles feed materials up to 44 in. at production rates of 100-1,200 tph. Choose from one of six models; each developed explicitly for the unique demands of the aggregate industry.

**ROCK FACE TO
LOAD OUT.**

Superior Industries

Booth 1314

Superior recently debuted a new group of crushing, screening and washing equipment. These products joined an existing conveyor and custom plant portfolio for a complete product offering from "Rock Face to Load Out." In addition, Superior uses its material handling skills to design and build a dependable line of conveyor idlers, pulleys, scrapers and accessories.
